

T.D. WRIGHT, INC.

Magnetic Rotary Tool

Model MMC8
MODULAR™ MAGNETIC Cylinder
for Printing and Die Cutting

U.S. Patent 6,454,686

PROVEN Reliability
PROVEN Compatability
PROVEN Efficiency

Innovative and effective, the patented Modular™ magnetic cylinder combines superior magnetic holding power with precision manufacture. Proven compatible with all wraparound flexible dies, and available to fit any press or die unit.

Modular™ Magnetic—
The Better Magnetic Cylinder Investment

T.D. WRIGHT, INC.

Model MMC8 Modular™ Magnetic Cylinder

for Printing and Die Cutting

Realize the full cost saving potential of wraparound flexible steel dies. The MODULAR™ MAGNETIC Cylinder is optimized for printing and die cutting.

Unlike with old "Channel" type cylinders, uniform magnetic attraction is assured by a patented matrix of powerful magnetic sub-assemblies—The Modular Advantage.

Features:

- Powerful matrix** of ceramic magnets can be intermingled with super strong Rare Earth magnets for perfect balance of strength and cost effectiveness
- Modular surface** allows finishing to better tolerances than channel type cylinders
- Pin register** system option
- Staggered Magnets** eliminate "high-low" surface variation

Benefits:

- Replaces** costly hard tooling
- Compatible** with any flexible steel die or steel-backed plate
- Improved** die life
- Die/Plate slippage** eliminated
- Faster and easier** die mounting
- Precision manufactured** to fit any press or diecutting unit
